Frontend Theme and Layout customization

1. Create custom theme,

- vendor name should be **kitchen** and theme name should be **your name.**

- create **custom.js** under theme.

- add custom.js to all front-end pages.

- Write a code in custom.js to open modal popup with msg "Welcome to Kitchen365", this popup should be open every time page reloads.

2. Create Static block : **CurrentTime**, content should be,

"Current Time : {Show CurrentDate and Time}"

Ex: "Current Time : 2024-05-06 12:00:05"

- Add this static block to all pages.

3. Create store configuration Yes/No: if Yes, then only **CurrentTime** static block should be visible.

4. Change Home Page's page title with: **Welcome to Kitchen365**

- do this using event.
